Pentair Water

Cartridge Filter

The compact Onga Pantera range of Cartridge Filters makes them ideal for confined spaces. A Cartridge Filter offers a more effective filtration area for the space taken. When water is in short supply a Cartridge Filter is a wise choice, as there is minimal waste-water due to no backwash cycle.

Pantera Cartridge Filter

Features	Benefits
Compact Design	Allowing a more effective filtration area a cartridge filter takes up less space when compared to sand or D.E. filters. They are lightweight, compact and easy to install.
Save water	By using a cartridge filter you do not backwash to waste when cleaning is required. To clean the cartridge element you remove it from the housing and soak in a cleaning solution or fit a spray nozzle to your garden hose and wash away the debris.
40mm and 50mm Plumbing	For ease of installation the Onga Pantera range of cartridge filters has the option of plumbing in 50mm or 40mm for hassle free connection.
Less maintenance	There are no moving parts in the Onga Pantera Cartridge filter making them trouble free.
